

WEEK FOR ANIMAL LIBERATION

ZAD, NOTRE-DAME DES LANDES (NEAR NANTES)
5-11 AUGUST 2013

"Here millions of animals are threatened by concreting, but at this time they are already thousands of farm animals who live here locked up, often before being killed in the more or less long term . Many people involved in this operation are however inhabitants fighting here against the same enemy as we, most for much longer than us. All this makes the fight against animal exploitation more topical here than elsewhere, but also difficult to achieve in a movement that largely refuses to consider it as a domination to destroy. However, we believe that there is much here to build on this, in a fight that seems to have opened a breach in France the question of animals and nature "
